

## Early Intervention

### *Infant/Toddler Program*

While all children grow and change at their own rate, some children can experience delays in their development. Sometimes this can be cause for concern. Our Early Intervention helps families at this critical time. Early Intervention provides support to caregivers during everyday routines by modeling strategies to enhance the child's development. High quality Early Intervention services can change a child's developmental trajectory and improve outcomes for children, families, and communities.

For a referral, please speak with your child's pediatrician or call us directly at 267-893-5402.

## Intellectual Disability Services

Intellectual Disability Supports Coordination Services are provided to children ages 3 and up with an Intellectual Disability (ID) who have been deemed eligible by the County. Supports Coordinators (SCs) locate, coordinate, and monitor services for individuals and their families. SCs help individuals and families find appropriate programs including home care services, respite care, vocational services, residential care, and other specialized services and supports. SCs also coordinate and monitor these services once accessed.

For more information about ID services, please call 267-893-5220.

## Children's Services

Lenape Valley Foundation's philosophy of treatment is to include the child's support system in treatment and service planning. We provide a wide array of services that are family focused, trauma informed and use evidenced based practices. It is our goal to link with the community in serving the child and family. We prioritize collaboration of care with pediatricians, family practice doctors and other professionals.

## Crisis and Emergency Services

Crisis and emergency services are available 24 hours a day for all Bucks County residents regardless of insurance coverage or financial resources. Services are provided in the Emergency Rooms of Doylestown Hospital, Lower Bucks Hospital and St. Mary Medical Center. The Acute Care Center located on the grounds of Lower Bucks Hospital also offers services Monday through Friday from 8:00 am to 11:00 pm. At all locations, services can be provided in person or by telephone and include crisis assessment and referral. If necessary, facilitation of voluntary and involuntary hospitalization will be provided as well. Telepsychiatry, the use of real-time video conferencing, also is available at the Acute Care Center and will facilitate an interaction between a Child Psychiatrist and a child or adolescent in need of immediate psychiatric assessment.

## Information and Referral Services

Information and Referral Services will assist children and their families with accessing services at Lenape Valley Foundation as well as in the community. Services are available by telephone and in person. Should you have a question or need an appointment, contact the Information and Referral Department.

## Outpatient Services

A range of outpatient services are available for children and their families including individual, family and group therapy, and psychiatry. Our therapists specialize in a variety of treatment modalities to fit the needs of children including play therapy, sand tray, and traditional talk therapies.

## Children's Mental Health Case Management

Children's Mental Health Case Management assists children ages 3 to 17 with serious emotional disturbances and their families to plan, access, and coordinate mental health and supportive services. Case managers assist in connecting behavioral and physical health services, identifying and linking children and families to community supports and, if needed, assist with insurance benefits to gain access to supports and services.

## Behavioral Health Rehabilitation Services (BHRS)

Behavioral Health Rehabilitation Services (BHRS) are delivered by a team of skilled child specialists offering intensive, time-limited, behavioral health treatment for children ages 1 to 21. BHRS connects with families to help increase family stability while also managing the child's behavioral challenges within the context of the home, school, and community.

The specific members of the treatment team and the amount of weekly service hours are determined following a psychological evaluation. Individualized services may consist of a Behavioral Specialist Consultant, who works with the child and family to create a treatment plan to address and modify behavior; a Mobile Therapist, who provides clinical services to the family in their home; and possibly a Therapeutic Staff Support professional, who works one-on-one with the child and caregiver to address behavioral issues both in the home and in the community.

Payment for BHRS services are made through Pennsylvania's Medical Assistance (MA) program. If needed, LVF will support families in securing MA for their child in order to access BHRS Services.
