ACT PROGRAM

Assertive Community Treatment (ACT) is an evidence-based, nationally known service delivery model, providing comprehensive community-based treatment for persons with severe and persistent mental illnesses.

Lenape Valley Foundation's ACT Program has been designated as statewide ACT consultants and "A Center of Excellence" by the Pennsylvania Office of Mental Health and Substance Services.

The ACT Program team is comprised of highly skilled professionals in the disciplines of psychiatry, social work, nursing, substance abuse counseling, case management, supported employment, peer support, and counseling psychology. Team members partner with individuals in their homes, on the job, and in community settings to promote meeting individual recovery goals and community integration.

The program offers client-centered, recovery-oriented services including:

- **Psychiatric Treatment**
- **Individual Therapy**
- **Integrated Dual Disorder Services**
- **Group Therapy and Activities**
- **Peer Support**
- **Rehabilitative Services**
- **Health and Wellness Support**

ACT serves people 18 and older who reside in Central and Upper Bucks County, and is funded through Medical Assistance and the Bucks County Office of Mental Health/Developmental Programs. The program is aimed at helping people who: have a primary diagnosis of schizophrenia, schizoaffective disorder, or bipolar disorder; have a history of recent hospitalizations, incarceration, homelessness, co-occurring disorders, and/or legal issues; and are unable to benefit from less intensive levels of care.
